

Practice Traffic Pattern

Lanes 0-1 are for traffic from finish to start. Lanes 2-3 are dead, with no traffic. Lanes 4-6 are for traffic from start to finish. Lane 7 is for traffic from the start that will exit at the embayment and return to the docks.

Crews ARE permitted to practice both above the RR bridge and below the finish line, but do so at their own risk. They must follow the traffic pattern when they are near the course.
